Quantum computing breakthroughs and bitcoin security  
GETTY

The [recent announcement](#) by Google CEO Sundar Pichai about their new quantum computing chip “Willow” has caused a [few waves](#) in the Bitcoin investment community and was like chum in the water for Bitcoin skeptics. Geiger Capital sent a [viral tweet](#) declaring “Bitcoin is dead” as a joke, but scores of skeptics jumped at the chance to disparage bitcoin. Every few years, perhaps instigated by Google’s successive chip announcements, quantum computing
